Serial No.

there is practically nothing that could not be remedied by the Dt Commr or the Head of the Dept concerned, if the facts are brought to his notice, and Govt. Can pass no useful orders in any of the matters.

4) The Standing orders seem to require revision, and the spirit of the G. O of 5-6-09 ~~needs clearly explained~~ applied to the previous order also

5) Our favour opinion

Asst Secy Sani Secy. Hy 15/10.

Submitted

6 In the year 1905, the Sanitary Commissioner suggested that visits of inspection on Municipalities by him or his Assistant may be sent to Govt. through the Chairmen of the Municipalities who within 6 weeks of the receipt of the report must convene a meeting of the Council to consider the report and to submit the same with his remarks for orders of Govt. The above suggestion was approved of in Govt. Memo No. 3132-40 Mul 34-05 of 21.9.05.

7) The Sanitary Commr again suggested that the notes of inspection on Municipalities submitted by the District Sanitary Officers as well, may be ordered to be dealt with according to the Govt. order, dated the 21st September 05. Govt. directed that every inspection report drawn up

Serial No.

by the District Sanitary officers need not be submitted to Govt. for orders and that such of the reports as the Sanitary Commr considers necessary may be

X submitted for orders of Govt.

8 It is a point for consideration whether the original

W order No. 3132-40 dt. 21.9.05 may be revised. The
Govt 34-25
order refers to only inspection of Municipal towns.

4.11.14

Both the orders referred to in the above note apply only to the case of municipalities. If the extracts of inspection notes in non municipal towns village are found necessary to be sent to the Govt, then a revision of the standing orders may be necessary. Rule 9 of 1909 is very clear in requiring only such portions of notes as is found necessary to be sent to Government.

a slaughter house for cattle within their own jurisdiction. The Municipal Council would do well to follow the lead of the Railway Company and have a small up-to-date slaughter house for sheep, goats etc. Examined the Birth and Death Registers and found the entries up to the end of May 1914. 3 births and 3 deaths in June and a similar number in July have not yet been entered. Instructed the Patel to enter these occurrences in the register soon after he comes to know them. The Sanitary Inspector was likewise asked to supervise the registration of vital statistics. The Anglo Vernacular School with ~~it~~ $ 194 boys possesses very insufficient accommodation. There being no compound wall, people commit nuisance close to the school building and stray cattle accommodate themselves in the veranda. The school atmosphere becomes thus greatly polluted. There is also no latrine or urinal attached to the School. The Girl's School and the Hindustani Boys' School are also overcrowded. The flooring in both buildings is bad. The cattle-pound which at the time of inspection contained about 20 head of cattle was in a very filthy condition and no water or fodder was provided for the animals.

Harnhalli - Population 2025. Houses about 400. There are a number of houses in ruins and also vacant sites. The village is formed into a Union and there is also a village Improvement Committee. The latter has not done any work as yet. The removal of prickly pear and lantana, opening roads to surrounding villages and improvement of wells can keep the hands of the Committee full for a long time to come. There are drains in the four important streets but the levels are

are all bad. The streets are kept clean. Examined the Birth and Death Register and found the entries up-to-date.

Yelawara - Population 238. Houses about 50. This village is combined with 3 other villages for the purposes of an Improvement Committee which has however shown no work as yet. Plenty of prickly pear awaits removal, The single well is not sufficient for the needs of the people. Another is necessary. The Birth and Death Registers could not be examined as the Patel had given it to the Sheikdar who had not returned it yet.

Bagalghatta - Population 415. Numbers of houses about 80. Examined the Birth and Death Register and found the entries carried up to the end of June 1914. No birth or death in July. A village improvement committee has been formed but has done no work. It has to build a chawadi and a school house and make a road to the Railway Station. There is only 1 well in the village. Drinking water is supplied by a well outside the village. 2 more wells appear to be necessary for the village.

Banavar - Population 2300. Houses about 460. Examined the Birth and Death Register and found it up-to-date. A large number of Deaths are put down to consumption which cannot be true considering the nature of the country, the general appearance of the people and the nature of the complaints for which people resort to the Local Fund Dispensary. The Village Improvement Committee has succeeded in removing silt from a " Kalyani " and from a number of wells and in collecting Rs. 1000/- for building a Musafar-Khana. Some of the wells

6

two for drinking water. The Birth and Death Registers were found to be all right.

Rudranahalli - Population 63 and houses 24. A dry and clean village. The gravel pits in front of the village formed by the Public Works Department have to be filled up by the Village Improvement Committee. The Birth and Death Register all right.

Hobbanahalli - Population 570 and houses 109. The Village Improvement Committee has to open a school and construct a school house for about 200 children in this and surrounding villages. It has also to build a chavadi and open out roads to the near villages. The streets are clean. There is a well sunk by the Patel, supplying good water. There are two manure pits in front of the village which have to be filled up and manure stored in a less objectionable place.

Mudodi - Population 519. Houses 100. The single Government well has brackish water and people use the water stored in a honda. The honda has to be cleaned and silt removed from it. As it is by the side of the public road, it is liable to gross pollution. The Village Improvement Committee has to look to this important matter. The village is also badly in need of a school. The Birth and Death Register was found to be all right.

Boranahalli - Population 113 and sheds about 30. The people have given up the old village site and are living in sheds a furlong to the north of the old village. Approved of site (Survey No. 9) proposed for the extension of the village.

to the town through pipes and stand posts the cost will not be prohibitive and the people will have the benefits of a good protected water supply. There is no slaughter house. In a sweet-meat shop, the articles exposed were covered with flies and ants and the Amildar promised to see that they would be kept in closed tins with glass fronts. The Birth and Death Register was examined. A large number of Deaths are put down to consumption but the Hospital records do not show any prevalence of this disease and the town is a dry and healthy one. No births are noted in March 1914 but in the duplicate copy sent to the Taluk Office, 8 births are recorded. No deaths are said to have occurred in January 1914. This requires verification. The Sanitary Inspector was instructed to supervise ~~to supervise~~ the correct registration of vital statistics. The A.V. School has 198 boys on its rolls. For the 9 classes the accommodation is insufficient. 2 or even 3 classes are held in the same room. The building is in a state of bad repair~~ing~~ and also requires extension. No latrine ~~urinal~~ or urinal is attached to the school. The school has no compound wall and is also not provided with gymnastic apparatus. The Wesleyan Mission Girls' School has 70 girls on its rolls and is housed in a decent building. The flooring however is not good. Either tiles or cuddappa slabs should be used. A latrine is attached to the school.

Yachenahalli - Population 500. Houses about 100. The Village Improvement Committee which has been formed has yet done no work. The construction of a school ~~of~~ and a chavadi, improvement of the roads and sinking more wells are some of the items of

people. A few wells near the tank would be safer. The attention of the Village Improvement Committee was called to this. A good Vaidyasala has been built by one of the prominent members of the Jain Community and is in charge of a Pandit. Examined the Birth and Death Register and found it all right.

Hindalahalli - Population 630. Houses 112. The Village Improvement Committee has opened a reading room and is engaged in building a school house, in sinking a new well and in improving the roads. The Birth and Death Register was found to be correct up to date. Inspected the proposed site for a school building and approved of it.

Mallenhalli - Population 149. Houses 36. This is addon to Yechenahalli for a Village Improvement Committee which is engaged in repairing a temple and improving the roads. A draw well is necessary. Examined the Birth and Death Register and found it all right.

Cholenahalli - Population 641. Houses 140. The Village Improvement Committee is engaged in building a temple, improving roads and filling up pits. Wells and the channel from Hemavati supply drinking water. A new well is necessary in front of the temple. Approved of a four acres' site to the west of the channel for extending the village. The houses on the eastern side of the channel are damp being on a lower level than the channel itself. A school and a chavadi are necessary and will engage the attention of the Village Improvement Committee. Examined the Birth and Death Register and found the entries up
